

IQAC and Green Club has organized awareness about water conservation on 22 March 2024. All the students of our college has taken oath to save a single drop of water for sustainability. Students have even pledged for maintaining the purity and increase the water storage facilities which will be helpful for our country. Student were taken to campus tour to show them the water distribution system and maintaining the greenery. The Principal and teachers have equally shown their enthusiasm to protect the water from getting wasted and polluted.

Glimpses of the Water Conservation Oath taking

- Water is Life
- Every drop of water is very important part of my life and I love my life.
- I am proud of rich and varied sources of water within my country.
- I will make an effort to imbibe ability of protect single drop of water and I will pledge to use water in a meticulous way.
- To maintain the purity and increase the water storage facilities. It will not only helpful for me but also entire country.
- I will take care of my beloved, animals & green cover around me and make it sure to supply adequate water.
- If I am not participating in water harvesting, then I do not have right waste water.
- I will conserve water from my farm, roof, and courtyard.
- I pledge to put in efforts to conserve maximum amount of water.
